DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Burkett et al (US 4,913,038).

Burkett et al anticipates the structure claimed including a control system having a display portion (2) which changes according to the selection of predetermined cooking menu and the predetermined operating switches (16-18) for controlling the cooking conditions of the utensil.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Edamura (US 4,972,060).

Edamura shows the structure claimed including a control system having a display portion (12) with operating switches (11) for selecting a predetermined cooking menu which then enables the system to control the heating and cooking process.

Response to Arguments

4. The applicant argues that Burkett et al does not show the switches that correspond to the names being displayed and, further, points out that the switch is not positioned adjacent to a particular display mode. In Burkett et al, the switches are positioned adjacent to the display mode portion and they are situated at the positions that correspond to the display portion. The claimed “respective positions” are not limited to any particular area or areas. The respective positions can

be the areas below the display portion as shown in Burkett et al. Thus the applicant's arguments are not deemed persuasive.

This action is made non-final since claim 4 was not included in the previous office action.
